

The earth is the Lord's and everything in it.
Psalm 24

Who likes the Simpsons ?

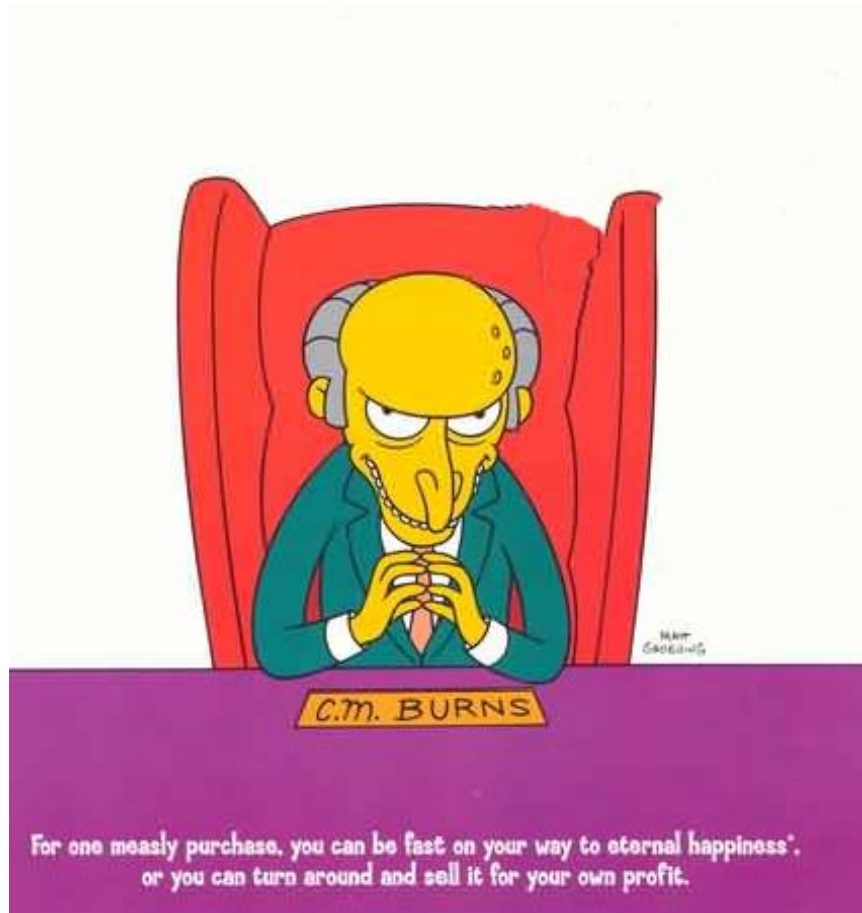

Who is your favourite ?

Bart

Who
don't you
like ?

**His power
plant
produces
pollution**

Every day, diarrhoeal diseases cause some 6,000 deaths, mostly among children under five.

With simple hygiene measures such as washing hands after using the toilet or before preparing food, most of these deaths are preventable.

Unesco

Who is
the
most
greedy?

Half of the World's population
live in poverty

But.....

The world
produces
enough
food to
feed
everyone

Let's imagine for a few minutes that the population of the world is shrunk to just 100 people...

**6 people would possess
59% of the entire world's
wealth (and they would all
be from the United
States)...**

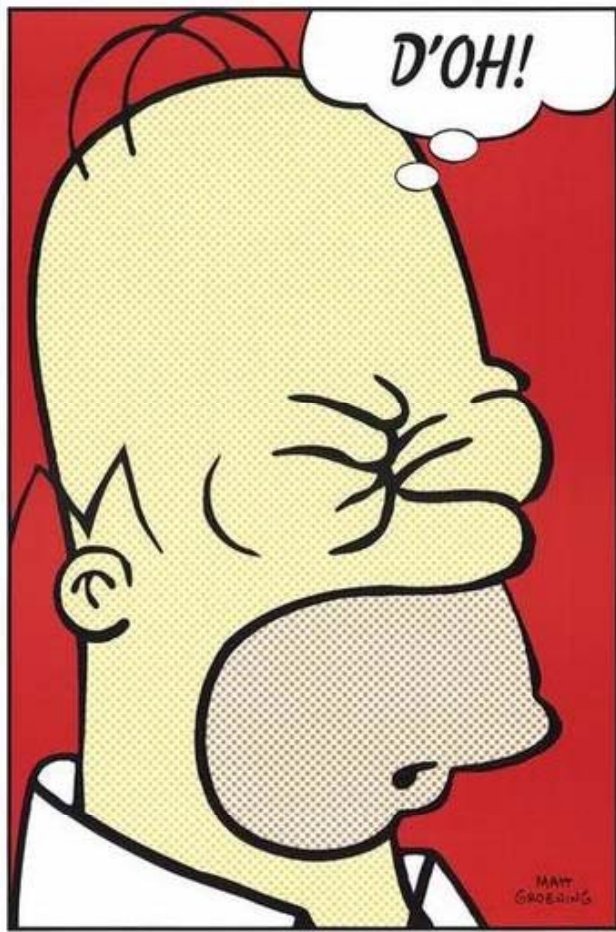

**80 would live in poor homes
- or worse...**

**70 would be unable to
read...**

50 would be malnourished...

**1 would be educated
beyond school level...**

1 would have a computer.

**Each day 34,000
children die
from preventable
diseases. That is equal
to 24 children each
minute.**

(UNICEF, World Health Organization).

**Harvest Festival are times when
we remember how lucky we are.
We think of others who do not
have the most basic human
needs,
like food.**

**We have to
learn to
share...
and
think
of others**
